I am a 6th semester Information Systems student at Surabaya State University with a strong interest in data analysis and data-driven decision making. I am a fast learner with good analytical thinking, effective communication skills, and the ability to work collaboratively in team environments. I have experience using Python for data processing and analysis, along with basic SQL, spreadsheets, and web technologies such as HTML, CSS, and JavaScript. My academic background has equipped me with an understanding of business processes, system analysis, and how data can be transformed into actionable insights. I am highly motivated to grow as a Data Analyst Intern by contributing to data analysis, pattern identification, and supporting strategic decision-making through real-world data.

EDUCATION

Universitas Negeri Surabaya

Faculty of Engineering

• GPA: 3.84/4.00 – Field: Information System

• Relevant Coursework: Data Analysis, Data Visualization, Machine Learning, UI/UX

Surabaya, Indonesia

August 2023 – present

Studi Independen Studi Independen Celerates Acceleration Mastery Program

Jakarta, Indonesia

Data Science and Generative AI

September – December 2025

The Celerates Acceleration Mastery Program, an initiative by PT Mitra Talenta Grup (Celerates), is designed to equip students with project-based learning outside regular coursework while remaining fully credited academically. The program provided comprehensive exposure to data science, machine learning, and generative AI, with a strong emphasis on analytical thinking and real-world applications.

- Learning objectives: 1) Data Science and NLP Fundamentals; 2) Statistical Thinking for Data; 3) Python, Git, and Streamlit for Data Analysis; 4) Applied and Practical Machine Learning; 5) Applied Deep Learning and Generative AI; 6) Prompt Engineering and AI Application Development.

LEADERSHIP EXPERIENCE

AIESEC in Surabaya

Chief Product Officer of Youth Engagement

Surabaya, Indonesia

January 2026 – Now

Key Responsibilities

- Led a cross-functional team of 11 members in designing and executing strategic project initiatives.
- Developed end-to-end project and product strategies to engage 1,200+ youth across Surabaya.
- Managed and scaled 3 key programs: AIESEC Future Leaders (AFL), Local Volunteer (LV), and Global Village..
- Oversaw project planning, execution, and performance tracking to ensure alignment with organizational goals.
- Drove youth engagement through innovative program development, partnerships, and campaign activation.

AIESEC in Surabaya

Organizing Committee Vice President Program, Join AIESEC 2025

Surabaya, Indonesia

May – November 2025

Key Responsibilities

- Led and managed a team to ensure effective end-to-end program execution.
- Designed and executed “Kepoin AIESEC” (three waves) and “Youth Today x Join AIESEC”, engaging 1,300+

- participants in total.
- Designed program concepts and participant journeys to enhance engagement and learning experience.
- Managed internal and external stakeholders, including partners and speakers, to ensure alignment and successful collaboration.
- Coordinated speaker management, covering selection, communication, and session preparation.
- Developed and monitored a structured program timeline while resolving operational issues to ensure smooth and on-time implementation.

PROJECT EXPERIENCE

WEATHER CHECK

Surabaya, Indonesia

Full-Stack Developer

January 2026

- Developed a full-stack weather application that provides real-time weather data based on user-input cities using external API integration.
- Built and managed backend services using Node.js and Express, including API handling, routing, and error management for reliable data retrieval.
- Integrated OpenWeather API to fetch and process weather data such as temperature, humidity, wind speed, and weather conditions.
- Designed and implemented a responsive frontend interface to display weather information clearly and interactively for users.
- Deployed the application on Vercel, including environment variable configuration and debugging deployment issues to ensure smooth functionality.

CLICKMART

Surabaya, Indonesia

Data Analyst – EDA & Modeling

November- Desember 2025

- Conducted exploratory data analysis (EDA) to identify user behavior patterns and data insights used to support the development of an AI-based product recommendation system.
- Developed and evaluated recommendation models using machine learning and LLM-based approaches, collaborating with the team to align analytical outputs with system requirements.

TASK MANAGER API

Surabaya, Indonesia

Back-End Developer

July - August 2025

Tech Stack : Node.js, Express.js, PostgreSQL, JWT, Bcrypt, Joi

Live Demo : task-manager-api-production-df76.up.railway.app

- Built a RESTful API for task management using Node.js and Express.js with a structured MVC architecture.
- Implemented JWT-based authentication system including user registration, login, and route protection with bcrypt password hashing.
- Designed and managed a PostgreSQL relational database with foreign key relationships between users and tasks.
- Applied input validation using Joi and implemented consistent error handling across all endpoints.
- Deployed the application to Railway cloud platform, accessible via a live public URL.

AVGUDA

Surabaya, Indonesia

Front-End Web Developer and Project Manager

May - June 2025

- Led the development of Avguda, a book community website, serving as Project Manager while coordinating technical implementation and deployment.
- Managed and coordinated a small team to ensure task delegation, timeline adherence, and smooth end-to-end project execution.
- Developed and deployed the website using HTML, CSS, Java, and a local database, including hosting setup to enable user interaction and content management.

HYDRO TRANSACT ID

Surabaya, Indonesia

Web Designer & Business Process Analyst

April 2025

- Designed and developed the company website using Wix, translating business needs into a clear and structured digital interface.
- Analyzed user consumption flow and business processes to ensure the website supported efficient information delivery and user interaction.
- Evaluated and optimized user experience (UX) by aligning website structure, navigation, and content flow with user behavior and business objectives.

SKILLS & INTERESTS

Technical Skills : Data Analysis (Python (Pandas, NumPy), SQL, Microsoft Excel, Google Sheets), Data Visualization (Streamlit), Machine Learning (EDA, Data Cleaning, Applied Machine Learning, Basic LLM-Based Modeling), Web & Data Systems (HTML, CSS, JavaScript, Python)

Soft Skills : Problem Solving, Teamwork, Adaptability, Time Management, Leadership, Effective Communication

Interests : Data Analyst, Data Scientist, Front-End Developer, Project Manager, Business Intelligence
